EP

estremamente ponticello

highest possible tone (of the string you are playing on)

a very high flageolet

Piano:

pizz. o

pluck the string with your fingertip.

strappare le corde

strike the strings with hand.

Flageolets. Touch the string at given place (here: 1/3 point of it) while playing the key with the other hand. The tone that is to be produced is given in brackets.

et.

Etouffee. Press the given string(s) firmly, and play the key with the other hand. A damped sound.

et.

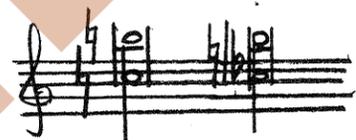

Etouffee. Press the given string(s) lightly and play the key with the other hand. A sounding, harmonic sound.

et.

Glissando along the given string to produce a change from harmonics to damped sound.

gliss. sulle corde

Play a glissando (glissandi) with your fingers on the strings.

Different marking for clusters. All clusters are chromatic.

For the 2nd movement: ent:

These strings are to be prepared by putting thick, heavy, round furniture bolts or something of the kind between the different single strings. The sound of every prepared key must be very rich and unharmonic; please try to find a many different spectrums as possible!

NB! Because the preparation of the piano is needed only in the 2nd movement and the instrument should thus be put in order again for the 3rd movement, it is advised that if there is a possibility of using two different pianos in a concert performance, they should be used. In case that there is not, it might happen that the pauses between the different movements become too long. In such case, the 2nd movement can be tape recorded beforehand and played on a tape recorder in the concert; players should then sit quietly on their places.
